NT1 ACE3

Triple NT1

Product Features

- Three NT1s in a single enclosure
- Optimized for 384 kbps videoconferencing applications
- Supports multiple switch vendors; LUCENT 5ESS™, NT1 DMS-100™, Siemens EWSD, NEC, and National ISDN-1
- LED display to indicate power and network status
- Provides U-interface lightning protection
- Industry-leading five-year North American warranty

The ADTRAN NT1 ACE3® combines the functionality of the three NT1s in a single device. Connection to the ISDN network is accomplished via three U-interfaces, and connection to the subscribers' terminal equipment utilizing three S/T-interfaces. The U- and S/T-interfaces on the NT1 ACE3 conform to ANSI and CCITT standards and perform all Layer 1 functions.

The NT1 ACE3 is designed with aesthetics as well as functionality in mind. The unit is enclosed in an attractive, durable plastic housing appropriate for desktop or wall-mount use. The NT1 ACE3 is powered by the external power supply provided with the unit.

The NT1 ACE3 provides 100 ohm bus termination and is protected from lightening and harmful line transients on the network interfaces.

Six LED status indicators on the NT1 ACE3 aid in fault isolation. Indicators display the status for Power, Network Ready, Network and Customer Errors, and Network Test.
