

SFP

2.67Gbps BIDI 80 km

Quick Start

DESCRIPTION

This guide supports the following products:

Part Number	Description
1442825F1	SFP 2.67Gbps BIDI 1590/1490 nm
1442825F2	SFP 2.67Gbps BIDI 1490/1590 nm

The Small Form-Factor Pluggable (SFP) 2.67Gbps Bidirectional (BIDI) 80 km plugs into ADTRAN equipment designed to accept SFPs. Installed into an appropriate host unit, the Bidirectional single fiber BIDI SFP provides up to 2.67Gbps optical interface to the supporting system.

NOTE

The 1442825F1 and 1442825F2 must be deployed as pairs at each end of the system. The 1442825F1 must be connected to the 1442825F2 at the other end of the fiber.

INSTALLATION

To install the SFP into an appropriate module, complete the following steps:

1. Inspect the SFP. If damaged, file a claim with the carrier and then contact ADTRAN Customer Service.
2. Do not remove the protective end cap from the SFP until the fiber optic cable is ready to be connected.
3. Insert the SFP into the SFP cage on the module. Ensure the manufacturer's label on the SFP is facing upward for correct installation.
4. Slide the SFP all the way into the receptacle until there is an audible "click."

NOTICE

The latch on the SFP is used to remove the SFP from the cage on the circuit card

CAUTION!

Due to compliance certification requirements, use only SFPs supplied by ADTRAN. ADTRAN cannot certify system integrity with other SFPs.

CAUTION!

- Electrostatic Discharge (ESD) can damage electronic modules. When handling modules, wear an antistatic discharge wrist strap to prevent damage to electronic components. Place modules in antistatic packing material when transporting or storing. When working on modules, always place them on an approved antistatic mat that is electrically grounded.
- The SFP meets or exceeds all the applicable requirements of NEBS, Telcordia GR-63-CORE, and GR-1089-CORE. The product is intended for deployment in Central Office type facilities, EEEs, EECs, and locations where the NEC applies (for example, Customer Premises.)
- Per GR-1089-CORE the ADTRAN system that the SFP is being deployed in is designed and intended for installation as part of a Common Bonding Network (CBN). The ADTRAN system that the SFP is being deployed in is not designed nor intended for installation as part of an Isolated Bonding Network (IBN).
- This product does not have an internal DC connection between battery return and frame ground. This product can be installed in a DC-I (isolated) or DC-C (common) configuration.
- The chassis frame ground terminal must be connected to an earth ground to ensure that the exposed metal (for example, front panels, SFP/XFP modules) on the product is properly grounded by way of the backplane connector.

NOTE

- The Gigabit Ethernet port(s) are optical and therefore are not classified as any type of port as defined in Appendix B of GR-1089-CORE.
- This product is designed to be deployed in GR-3108-CORE environmental class 2 as defined in GR-3108-CORE.
- This product is NRTL Listed to the applicable UL Standards. The product is designed to meet the applicable requirements of Telcordia GR-63-CORE and GR-1089-CORE.
- This product has also been evaluated to international safety standards EN 60950-1, AS/NZS 60950.1, and IEC 60950-1. This product meets the requirements for CE marking under the EMC Directive and Low Voltage Directive. Standards used to demonstrate Compliance are EN 300 386 and EN 60950.
