INSTALLATION

Before installing the equipment, inspect the SFP48-18C. If damage has occurred during shipping, file a claim with the carrier, and then contact ADTRAN Customer Support. For more information, refer to the warranty.

To install the SFP48-18C into an appropriate module, complete the following steps:

NOTE

Do not remove the protective end cap from the SFP until the fiber optic cable is ready to be connected.

1. Insert the SFP48-18C into the SFP cage on the module. Ensuring that the latch handle on the SFP is facing upward, slide the SFP all the way into the SFP cage until there is an audible “click”.

NOTE

The latch on the SFP is for removal only. When removing the SFP, rotate the latch away from the SFP, the SFP should easily slide out of the cage.

2. Do not remove the protective end cap until the optical fiber connection is made.

NOTICE

It is recommended that the protective end cap remain on whenever the transceiver optical fiber connector is not inserted.

3. Continue the installation and turn-up of the host module using the instructions in the Job Aid provided with the module or other system-level documentation available online at www.adtran.com.

MAINTENANCE

The SFP48-18C does not require routine hardware maintenance for normal operation. ADTRAN does not recommend that repairs be attempted in the field. Repair services may be obtained by returning the defective unit to ADTRAN. Refer to the warranty for further information.
